

The ICC Evaluation Service (ICC-ES) Seeks Interested Individuals to Serve on its Evaluation Committee

The ICC Evaluation Service (ICC-ES) seeks to fill openings on the ICC-ES Evaluation Committee, starting January 1, 2015, with qualified individuals who will evaluate proposed acceptance criteria prepared by staff concerning building products. Candidates must be representatives of a jurisdiction enforcing building regulations. Comments, by building industry members and academic experts, presented during public hearings or in written form, provide input to the committee. Committee decisions are based on whether there is sufficient evidence that the acceptance criteria address building official needs in enforcing building regulations.

The Evaluation Committee will conduct, per year, a minimum of three in-person meetings, each one or two days, with the possibility of one conference call. Appointees are expected to participate fully in all committee meetings and events.

New committee appointments are for a 12-month term, with eligibility for four subsequent terms based on performance and committee participation. Individuals interested in being considered for the Evaluation Committee should submit the attached application.

Applications will be accepted until August 22, 2014.

ICC-ES performs technical evaluations of building products, components, methods and materials. Manufacturers seek out ICC-ES reports to help bring products to market faster and assure acceptance. The evaluation process culminates with the issuance of technical reports that directly address code compliance and are extremely useful to both regulatory agencies and building product manufacturers. Agencies use evaluation reports to help determine compliance with codes and building regulations; manufacturers use reports as evidence their products meet code requirements and warrant regulatory approval. ICC-ES evaluation reports are public documents, available free of charge at www.icc-es.org, to building regulators, and manufacturers, as well as contractors, specifiers, architects, engineers and anyone with an interest in the building industry.

**APPLICATION FOR ICC EVALUATION SERVICE, LLC
EVALUATION COMMITTEE**

Applications will be accepted until August 22, 2014
