Eddie Van Giesen

**National Sales Manager
Raincycle, a WATTS company**

George Edward (Eddie) Van Giesen III is the National Sales Manager at Raincycle, a WATTS company. Eddie received his MLA at the University of Georgia in 1995, and his BA at the University of Georgia in 1984. He is an American Rainwater Catchment Systems Association (ARCSA) accredited professional. He speaks regularly at conferences, universities and professional associations, including The American Institute of Architects, American Society of Plumbing Engineers, American Society of Landscape Architects, International Association of Plumbing and Mechanical Officials among others.

He was co-author of *Designing Rainwater Harvesting Systems* (John Wiley 2014), and principal author of the *Georgia Rainwater Harvesting Guidelines* (Georgia Department of Community Affairs, in 2009). He assisted Georgia, California and North Carolina in developing rainwater plumbing codes and standards in coordination with the International Code Council (ICC) and IAPMO from 2009-present. He has lobbied and advocated in Georgia and California for codes favorable for rainwater harvesting.
