## Greg Johnson

Greg Johnson started a regulatory consulting practice six years ago after 14 years of construction industry experience as an installer and contractor; more than 16 years of local government building inspection experience; and nearly 17 years of non-profit association board experience including 1 year on the board of directors of the International Conference of Building Officials; 1 year on the board of directors of the International Accreditation Service; and 7 years on the board of directors of the International Code Council (ICC).

In the course of his career Greg has served on numerous codes and standards related committees. His service includes 3 years as chair of the ICC Education Committee and a term on the ICC Standards Council. He currently serves as a member of ASHRAE 189.1, the *Standard for the Design of High Performance, Green Buildings except Low-Rise Residential Buildings*; as a consensus body member for the revision of ANSI/GBI 01-201X: *Green Building Assessment Protocol for Commercial Buildings*; and as a consensus committee member ICC-700, the *National Green Building Standard*. His current service also includes the ICC's Sustainability and High Performance Code Action Committee and as Chair of the Governing Committee of the ICC's Sustainability Membership Council.

Greg teaches seminars on the administration of Chapter 17 special inspection provisions of the *International Building Code*. He also serves as an evaluator of building departments for accreditation, including service delivery and technical competency.
