

BIO

Dr. Jay L. Garland

Dr. Jay L. Garland joined the EPA in 2011 as a Division Director within the Office of Research and Development. His work is committed to the development of sustainable systems using sound ecological principles and innovative technology. He received a Ph.D. in Environment Science from the University of Virginia and spent over 20 years working on NASA's efforts to develop closed, bioregenerative life support systems for extended human spaceflight.
