ICC Partners with RedVector to Offer New Online Code Training Courses

The International Code Council (ICC) has partnered with RedVector.com, the leader in eLearning and workforce training solutions for the architecture, engineering, construction (AEC), industrial and facility management industries, to offer first-class code training in a dynamic new online format.

The International Codes, or I-Codes, published by the ICC are the preeminent codes used in the design, build and compliance process. They're used by most U.S. communities (including Federal agencies) and many global markets to create safe buildings and communities and protect the health and welfare of people who use and inhabit them.

As part of the new partnership, ICC and RedVector will develop over 50 hours of I-Code training courses, many of which were released this week.

"Providing quality training ensures that ICC Members and others in the construction industry have continuing education opportunities to support them in their careers and earning professional certifications, which impacts building safety," said ICC Executive Vice President and Director of Business Development Mark Johnson. "We are pleased to partner with RedVector.com to expand ICC's online training offerings."

The online courses will cover key topics including the *International Building Code*, *International Residential Code*, *International Green Construction Code*, *International Fire Code*, *International Plumbing Code*, *International Mechanical Code*, *International Energy Conservation Code* and more. The courses will be available at both www.RedVector.com and www.icccampus.org.

"We are proud to partner with the ICC and are excited to provide their world-class training content in an interactive, online training format," said Bobby Person, Product Director at RedVector. "The ICC sets the standard for building codes and RedVector excels in eLearning for the AEC industries. Together, we'll be able to offer professionals new and dynamic learning options on the complete set of comprehensive, coordinated building safety and fire prevention codes, and ultimately help benefit public safety."

About the International Code Council

The International Code Council (ICC) is a member-focused association dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes. For more information, contact 1-888-422-7233 or visit www.icccampus.org.

About RedVector

RedVector sets the standard for excellence in online continuing education and training for the architecture, engineering, construction (AEC), industrial and facility management industries and holds more than 60 state and national accreditations. RedVector offers individual courses as well as large-scale corporate training solutions for AEC firms featuring customizable and easily accessible online universities with a full range of tracking and reporting features. With an online library exceeding 1,500 courses authored by more than 100 subject matter experts, RedVector.com serves more than 200,000 AEC professionals in all 50 states. The recipient of numerous community honors and industry awards, RedVector was founded in 1999 and is headquartered in Tampa, Florida. For more information, call 1-866-546-1212 or visit www.RedVector.com.
