

2009 IECC Performing Residential Energy Plan Reviews

This workbook addresses numerous provisions in the 2009 *International Energy Conservation Code* (IECC) where the code contains requirements applicable to construction, and design of an residential construction, but that are not regulated specifically by the *International Residential Code*. The workbook is intended to help plan reviewer or building code officials responsible for plan review identify those areas where plan review will include compliance with the IECC. The workbook involves exercises and practice on several energy plan reviews that are intended to help the energy plan reviewer to identify those areas to inspect in the structure after approval in the review and ensure compliance with the IECC.

Kit includes: plans, plan review record and workbook.
