

# Introducing the **New 2010 ICC Chapter Education Training Benefit**

People Helping People Build a Safer World™

## **Live Instructor-led Seminars from ICC are Back!**

The most popular benefit of all, the Chapter Education Benefit day of training is once again available to all qualifying chapters. The new benefit has been deeply discounted in order to make it more affordable to our chapters. The 2010 Chapter Benefit training brings ICC Chapters valuable, convenient classroom training and the opportunity for Chapter members to earn CEUs. The new model discounts 50% off the prices for courses and training materials and enables ICC Chapters to use their Chapter Education Benefit as a fundraising tool.

Some details about the discounted day of training in the new Chapter Education Benefit:

- » One day of training is considered one 6-hour seminar or two 3-hour (half-day) seminars selected from ICC's Core Curriculum and taught by expert ICC Instructors.
- » Chapters can combine their Training Benefit Days with other chapters—call for more information.
- » Certain courses and workbooks are not included in this offer. Some examples include electrical, legal, and seismic training as well as any curriculum not owned by ICC.
- » There are no carry over days from 2009 in the new program.

**For more information or to schedule your Chapter Education Training benefit,  
please contact your Training & Education State Training Coordinator.**
