

Private Label Listing Evaluation Reports Now Offered

ICC Evaluation Service is now offering a method for report holders to authorize private labelers to have their own reports without data having to be transferred from the report holder (referred to as the “master report holder”) to the private labelers. The ICC-ES Rules of Procedure for

Evaluation Reports were amended on July 30, 2007, to allow report holders to authorize the issuing of a separate evaluation report under the name of a product distributor.

Such reports, known as [private label listing evaluation reports](#), are inextricably linked to the evaluation report originally issued and must remain identical to that report in all ways except the name of the report holder. Fees for new private label evaluation reports are the same as the basic fee for a one-year re-examination of an ICC-ES evaluation report without change. For details, see [Sections 3.0 and 6.1.6 of the Rules of Procedure for Evaluation Reports](#) and [Table 2 of the ICC-ES Fee Schedule](#).
