

# Retrofit Policies & Emerging Resilience Rating Systems

*A staff discussion for those in development, planning, design, construction and building operations*

## Hosted by:

The Resilience Building Coalition  
 Wednesday August 9, 2017  
 1:00pm - 4:30pm

## Location:

International Code Council  
 500 New Jersey Ave NW # 300  
 Washington, DC 20001

Please RSVP: [resilience@aia.org](mailto:resilience@aia.org)

Snacks / beverages by ICC

Less than 2% of buildings are replaced each year. Most of the building stock of 2030 already exists today. After a modern building has received a certificate of occupancy from the local jurisdiction, there are few if any regulations in place to monitor the safety and habitability of the building. Because many existing buildings were constructed without building codes, without the oversight of licensed professionals, and without building permits and construction inspections, these buildings may pose safety threats to occupants and the public. To enhance community resilience, the vulnerability of existing buildings must be addressed.

## Schedule:

- |        |  |
|--------|--|
| 1:00pm | Resilience updates from coalition members, including policy updates on NFIP and other activities   |
| 1:30pm | Enhancing resilience in the existing building stock  |
| 2:00pm | Advancing resilience through Rating Systems and other tools  |
|        | <ul style="list-style-type: none"> <li>The Alliance for National &amp; Community Resilience (ANCR)</li> <li>The Resiliency Action List (RELi)</li> <li>FORTIFIED</li> <li>USGBC's LEED Resilience Pilot Credits</li> <li>Green Globes</li> <li>The US Resiliency Council (USRC)</li> </ul> |
| 4:15pm | Wrap up and next steps   |

**August 9, 2017**
