

BIO

Hope Medina

Hope Medina likes to show her shade of green, and hopefully unveiling yours. She is an energy/green code consultant for Colorado Code Consulting, and a plans examiner for Cherry Hills Village, Colorado. Hope holds several ICC certifications that she utilizes as a plan analyst, inspector, and instructor.

Hope Medina enjoys speaking with people, so she has put it to a beneficial use by providing training to code officials, elected officials, and any interested party. She has spoken at the Next Generation Water Summit in the past and will be a speaker at this year's event. She also enjoyed her guest appearance on KCAA radio broadcast of The Water Zone by TORO.

Hope is very active in the code development process. She regularly attends the International Code Council's code change hearings to participate in improving the different codes, and is Co-Chair of the Colorado Chapter of ICC Code Change Committee for green codes. Hope has been involved with the development of the International Green Construction Code, and took the lead in the Green Code Collaboration Group which worked with stakeholders nationally on improving the 2015 IGCC.

Hope has served on the consensus committee for several cycles of the National Green Building Standard. She currently co-chairs the water efficiency task group, and chairs the mixed-use task group of the National Green Building Standard.

Hope is a governing committee member of ICC Sustainability Membership Council. She is a member of ICC's SEHPCAC, Sustainability, Energy and High Performance Code Action Committee.
